Create a unique bathroom design

Fibo wall panels are a high performance, completely waterproof system of interlocking laminated wooden panels that can transform your bathroom into a grout-free area.

With quick installation, these panels are warm to the touch, and easy to clean. If you choose a tile effect panel the fake grout lines are routed in meaning they not only look like tiles but feel like them too. You will struggle to tell the difference!

Available in a choice of designer colours and textures. Such as the Metro Brick, from the Urban Collection, a neat geometric design influenced by urban city environments.

- All panels are 2400mm high and 600mm wide
